OmniTrader PROFESSIONAL

This Changes Everything!

Ed Downs
CEO and Founder,
Nirvana Systems, Inc.

I hope my excitement is evident as I write this introduction to OmniTrader Professional. This release is, without a doubt, the single most significant event of my career. I started Nirvana Systems nearly 20 years ago with the goal of creating fully automated trading solutions for myself and our customers. This new version of OmniTrader not only fulfills this goal, it clearly ***changes everything***.

The five new Strategies in OmniTrader Professional are the most *powerful* we have ever released with any version of OmniTrader. These are complete real-world strategies ready for you to test and evaluate for your trading.

This Professional Edition provides everything you need to design profitable new Strategies. OmniLanguage - the trading language in Pro - includes an integrated Help System and makes it easy for anyone to write and test everything from Indicators to complete Trading Strategies.

Once you have a Strategy you want to trade, you can automate it with OmniPilot! It can run OmniTrader Pro to monitor the markets for you, continuously seeking and identifying the best trading opportunities. OmniPilot can even send alerts to your cell phone or PDA when Buy or Sell Signals fire. All of this power and more is at your fingertips.

When you purchase OmniTrader Professional, you get MUCH MORE than just software. You get instant access to a group of expert traders who are enthusiastic about sharing ideas in the exclusive Pro Forum AND our new OmniTrader Professional web site. To help you use all the new tools in Pro, I am including my new seminar, *Creating Profitable Strategies with OmniTrader Professional.*

I am thrilled to be able to deliver this product to our OmniTrader users. It represents an enormous investment of time and effort and truly is the achievement of a life goal for me. Get ready to take your trading to a whole new level with the unprecedented power and performance of OmniTrader Professional and OmniPilot.

Sincerely,

Ed Downs

Ed Downs
CEO and Founder,
Nirvana Systems, Inc.

P. S. Your satisfaction is GUARANTEED. If for any reason you are not satisfied with OmniTrader Pro, simply return it within 30 days for a 100% refund.

The POWER to Turn Your Trading Dreams into Reality

PERFORMANCE
PROGRAMMABILITY
AUTOMATION

Forget all the assumptions you have about trading software. With the introduction of OmniTrader Professional we have revolutionized the landscape of trading software. In this newsletter, you will discover how OmniTrader Professional has the potential to elevate your trading to new heights.

PERFORMANCE

The most significant benefit in Pro is the fact that the performance of our Strategies has been dramatically increased. We have included five new Strategies with the software that are generating ACROSS-THE-BOARD profitability in Forward Test data. See page 4.

Profitability Increased 100%!

Using the advanced features in OmniTrader Professional, we have been able to increase the profitability of ALL our Strategies! Profits in the Forward Test more than DOUBLED in the new Pro Strategies (see page 4).

PROGRAMMABILITY

Pro is Programmable! Now anyone can create or add Trading Systems, Indicators, and Exits right inside OmniTrader, using the most friendly language in the world - OmniLanguage! It's the *real* easy language. The built-in development environment comes with a Help System and a complete Indicator Library that make it easy to implement trading ideas, even for those who know nothing about programming. Read the complete OmniLanguage story on page 6.

AUTOMATION

The *Piece de Resistance* is our new, block-buster automation product - OmniPilot! As the name implies, OmniPilot acts as an *autopilot* for OmniTrader. It can run OmniTrader like a user would. It has text messaging capability and soon, will support remote access and brokerage (see page 12). Once you have tested and are comfortable with a Strategy, you can have OmniPilot run it for you, alerting you to signals or trading the Strategy automatically. Capture the excitement on page 10!

and Community

Ground-breaking software is just the beginning of the Pro story. We've had the unique opportunity to work with some of the finest traders in the world, and we are sharing this resource with all our users, by connecting them with the exclusive OmniTrader Pro Forum. Read the full story on page 13.

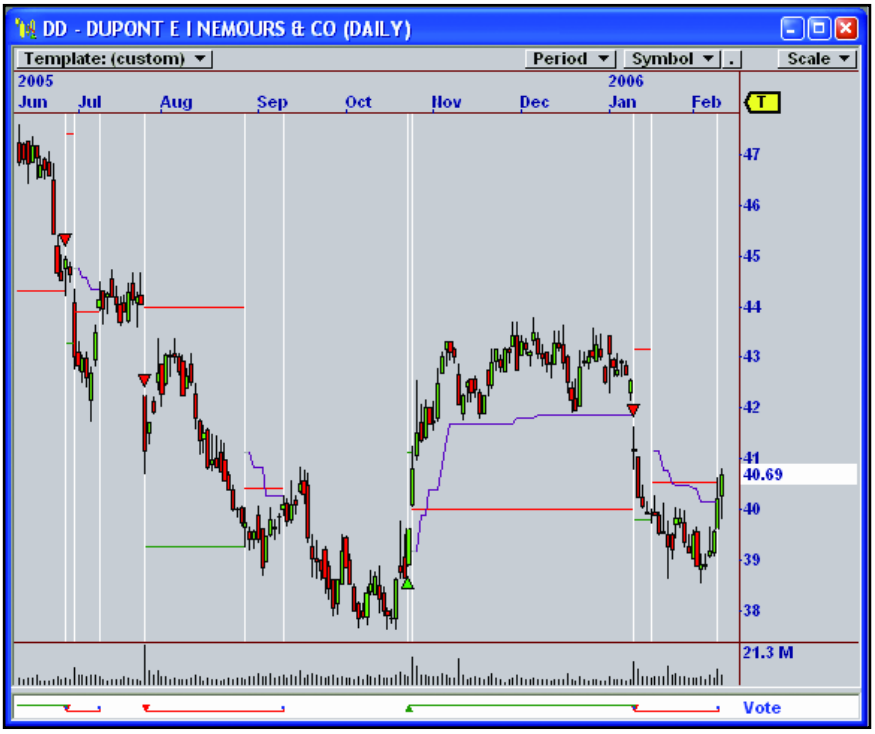
OmniTrader Professional has the power to turn your trading dreams into reality!

Awesome PERFORMANCE Gains!

New Technology in OmniTrader Professional Equals Awesome Performance

Several key innovations have given OmniTrader Professional unmatched power when it comes to creating profitable Trading Strategies. Using the new tools in Pro, we created five new Strategies, ALL of which are demonstrating Forward Test profitability (see table below).

This is a landmark achievement - the first time we have been able to achieve Forward Test profitability across the board in ALL of our Strategy approaches. Where else can you get this kind of trading power right out-of-the-box? No other software in the world can even come close to the performance of OmniTrader Professional.



The profitability of all our Strategies was improved using the advanced features of Pro - and especially the inclusion of Trade Plans in Strategies. This chart for DuPont demonstrates the Partial Exit concept at work.

NEW STRATEGIES in OmniTrader Pro

				Forward Test Results!		
Strategy	**BTNT**	**BTHR**	**BTAPR**	**FTNT**	**FTHR**	**FTAPR**
PRO Breakout	295	67%	63%	**322**	**52%**	**12%**
PRO Diverge	103	72%	89%	**111**	**67%**	**29%**
PRO Short Term	290	68%	149%	**223**	**65%**	**101%**
PRO Swing	214	75%	108%	**200**	**76%**	**47%**
PRO Trending	465	73%	54%	**471**	**62%**	**12%**

These results were taken from a recent test we performed on the stocks in the S&P 100 using a 4-year Back Test and 4-year Forward Test ending February 1, 2006. Every Strategy was profitable in out-of-sample Forward Test data, with one exceeding 100% APR! (1)

(1) In the report above, BTNT = Back Test Number of Trades, BTHR = Back Test Hit Rate (accuracy), BTAPR = Back Test APR, FTNT = Forward Test Number of Trades, FTHR = Forward Test Hit Rate (accuracy), and FTAPR = Forward Test APR. For more information on the tests and how the numbers are calculated, go to www.omnitrader.com/PROperformance.

Trade Plans Improve Performance

One of the most powerful features in OmniTrader Pro is the inclusion of Trade Plans in Strategies. This feature has allowed us to significantly improve performance using advanced money management techniques.

Now with OmniTrader Pro, we are able to generate consistently profitable Forward Tests. Do you realize what this means? We are on the verge of 100% automated trading!

All of these enhanced Strategies are included with OmniTrader Professional. No configuration or programming is required - just activate them and run the ToDo List.

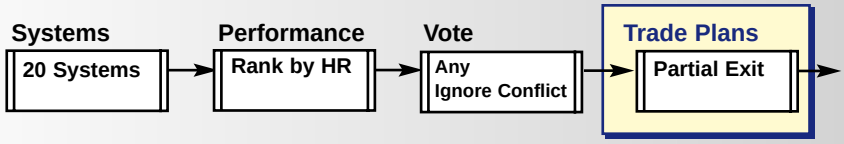
We are now turning our attention to our other Strategies. We have no doubt that the performance of all our Plug-Ins is going to improve as we apply the tools in Pro to them. But perhaps the most significant aspect is what our customers are going to start doing as THEY apply Pro to THEIR Strategies.

Empowering Technology

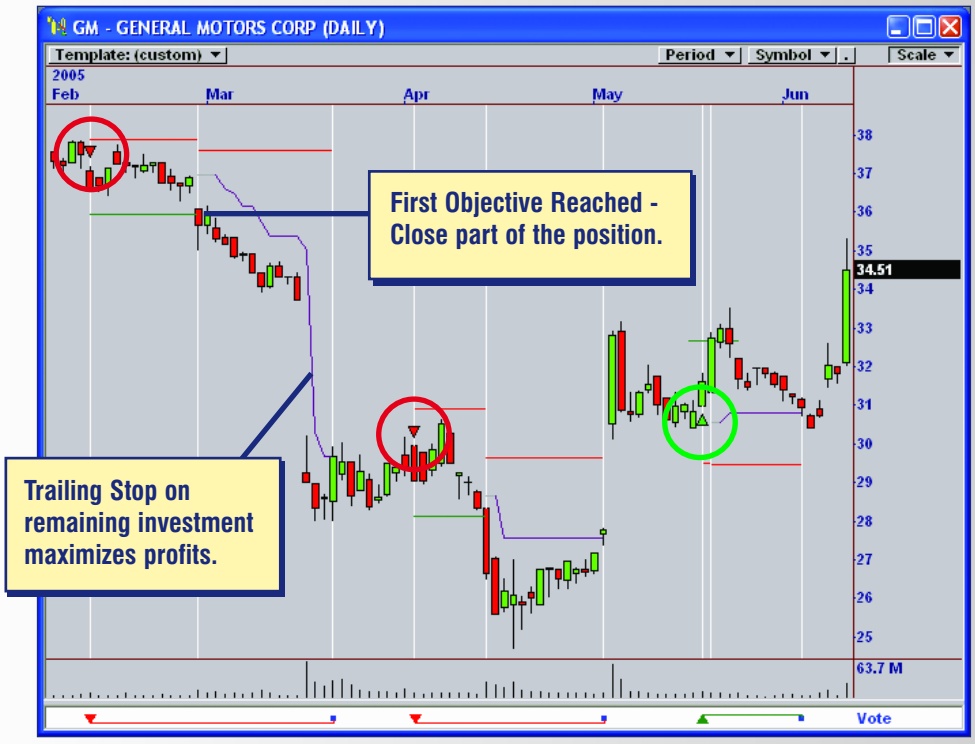
We have already proven that OmniTrader Professional is by far the best platform for developing winning Strategies. Add OmniPilot (see page 10), and you have the best trading software AND the means to automate it!

The Profit Magic of Trade Plans in Strategies

One of the key innovations in OmniTrader Professional is the new Trade Plans block in Strategies. This powerful new Strategy block has given us the ability to test and refine several advanced Money Management concepts, including the use of Partial Exits.



Strategy with Trade Plans block



The above chart for GM illustrates how Trade Plans in Strategies improve profitability. A portion of each position is closed when the first profit objective is reached (green line). Then, a trailing stop is used for the remainder of the trade. This has the effect of increasing profits because a large portion of the initial gain is captured, but the trade is allowed to run further. On the Long trade in May, this approach turned a losing trade into a profitable one.

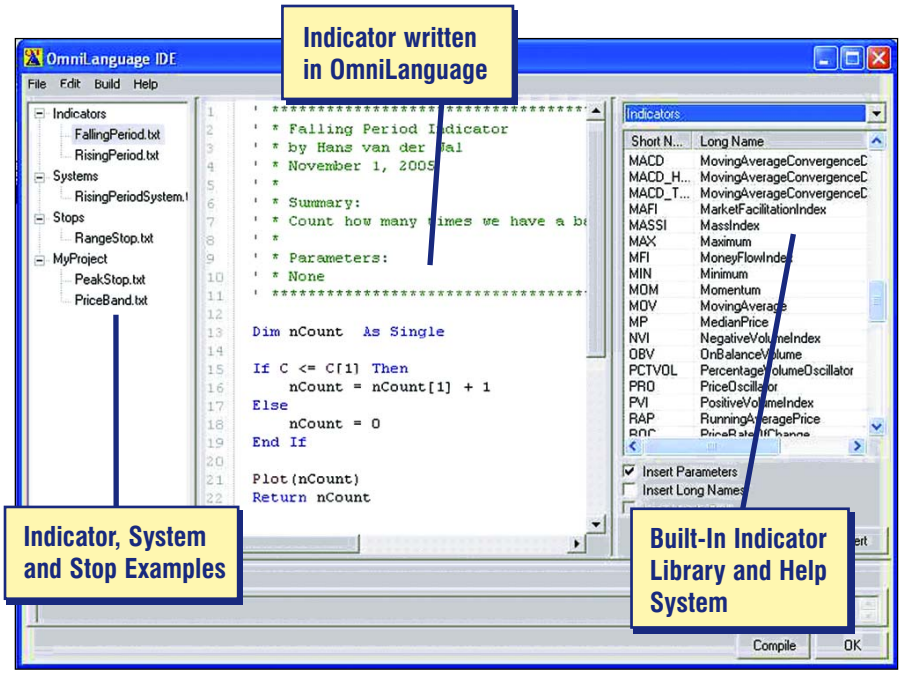
100% PROGRAMMABILITY with OmniLanguage

The New Standard for Trading Strategy Development

Now, you can implement your ideas directly in OmniTrader Pro! With OmniLanguage, we have redefined the ease and simplicity of developing Trading Strategy ideas.

OmniLanguage is based on Visual Basic. It's the real easy language. But having a great trading language is only half the solution to working on new System ideas.

We know that most people don't want (or know how) to write Systems from scratch. And with Pro, you don't have to. The software comes with a collection of powerful Trading Systems and Strategies that are great right out of the box. You can also modify them and try your own ideas. OmniLanguage includes an integrated Indicator Library with clear examples of Systems, Indicators, and Stops. We also provide great code examples on our Systems and Indicators web site (see opposite) and extra help in our exclusive Pro Forum.



OmniLanguage Interface. A collection of sample Indicators, Systems, and Stops are included. The Indicator Library and Help System make it easy to develop your own ideas.

There are now NO BARRIERS to creating precisely the kind of system you want. The sky's the limit with OmniTrader Pro!

The REAL Easy Language

A complete System can be written in just a few lines in OmniLanguage, as shown here.

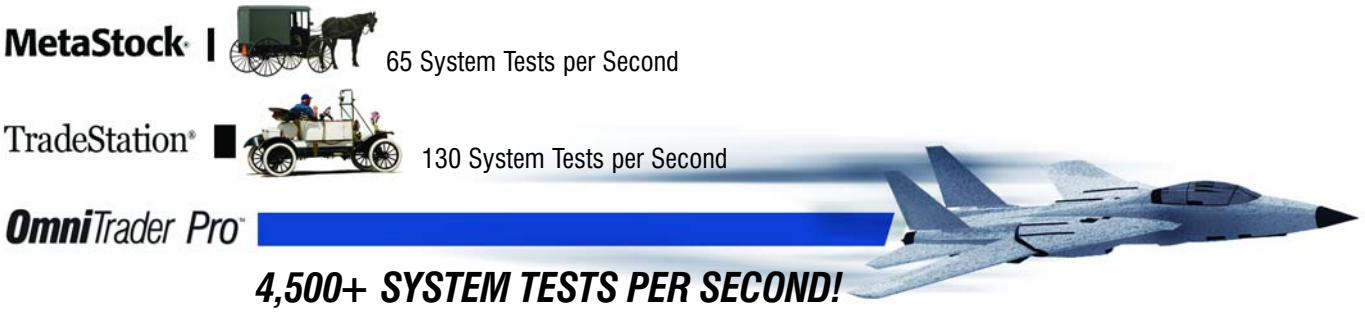
```
#System MySystem

If C > EMA(C,21) Then
      Signal = LongSignal
Else If C < EMA(C,21) Then
      Signal = ShortSignal
End If
```

OmniLanguage is easy to use. Writing a custom Indicator or System is as easy as changing a line or two in one of the samples included with the program. A complete OmniLanguage manual is also included with the software.

System Testing Advantage

OmniLanguage is based on Visual Basic .NET, the latest technology from Microsoft. We recently compared OmniTrader Professional against TradeStation® and MetaStock® - measuring the rate at which system tests can be run. The results were pretty amazing. OmniTrader Pro can test 10 Systems on 100 Stocks in about 2 minutes. To do the same job, TradeStation takes over an hour and MetaStock over 2 hours.[1]



Powerful Ideas & FREE Downloads

We want to empower our users to be the most successful traders and investors in the world. So, in addition to superior technology, we are providing new, innovative ways to assist you in System Development and Testing. Professional Edition users have access to the new Professional Systems and Indicators web site.

We review the most recent trade journals, including *Technical Analysis of Stocks and Commodities (TASC)*, *Active Trader*, *Barrons* and select web sites that feature Trading System ideas, and implement them in OmniLanguage for the convenience of our Pro users as FREE DOWNLOADS.

If you see a Trading System or Indicator you would like to try in OmniTrader Professional, just copy and paste it from the web site into OmniTrader Pro. The power of Pro gives you the ability to instantly use the greatest trading ideas of our time.

On page 13, read about the new OmniTrader Pro Forum, where we are connecting our Pro users with each other. When you get OmniTrader Professional, you plug into the best technology and the best trading minds in the world.

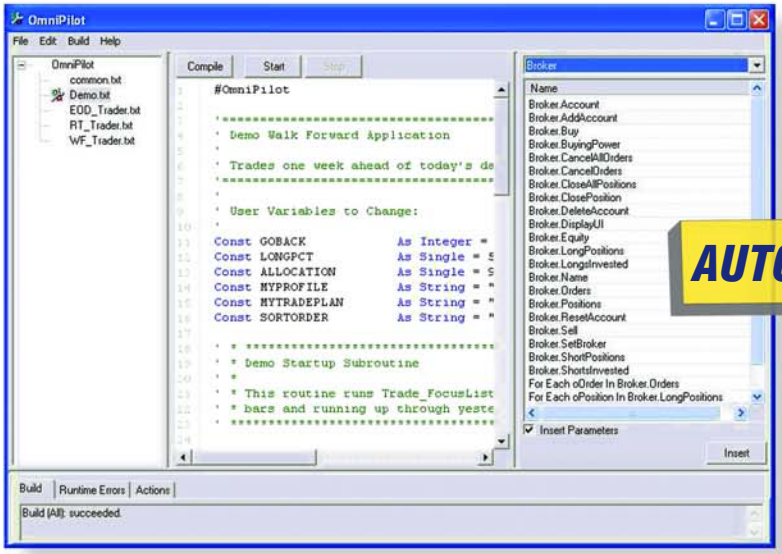
Our staff has implemented Indicators and Systems as published in current and recent issues of the primary trade journals.

[1] For the System Speed Test, MetaStock® 8.1 was used with the "Equis RSI 70/30 with optimization" system. The TradeStation® test was conducted using TradeStation 8.1 (build 3066) using the similar "RSI LE" strategy with optimization added. OmniTrader Professional was tested using an equivalent system written in OmniLanguage. For complete details on the test, see www.omnitrader.com/speed. MetaStock and TradeStation are registered trademarks of EQUIS International and TradeStation Securities, Inc., respectively.

OmniTrader PROFESSIONAL with OmniPilot

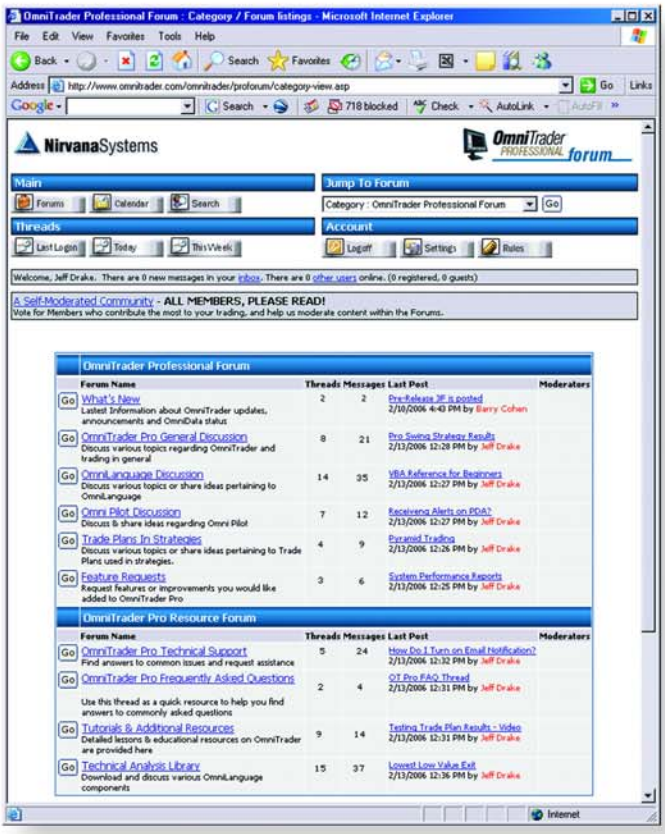
OmniPilot

OmniPilot runs Pro from the outside. It watches for signals and monitors the market to take the actions you specify.



AUTOMATE

OmniTrader Professional looks just like OmniTrader 2006. The interface is the same and the basic behavior is the same. But under the "hood" is an entirely new Strategy Engine.



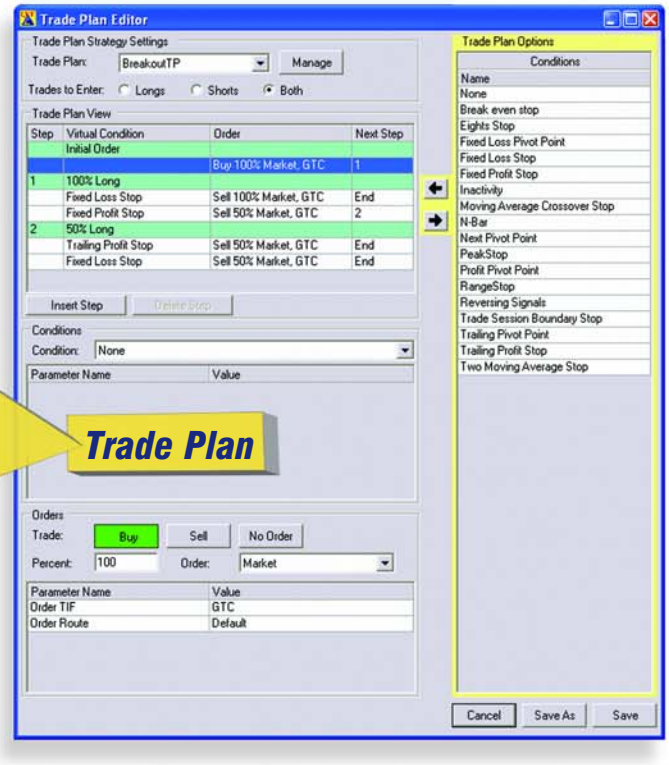
OmniTrader Pro Forum

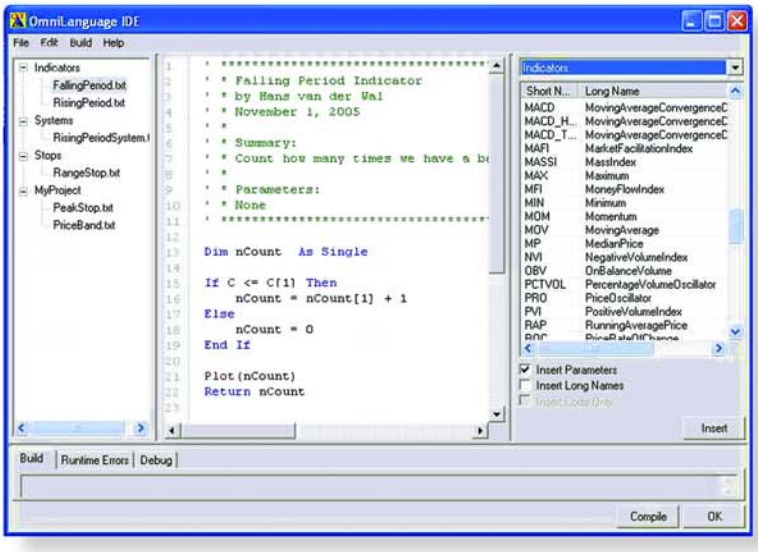
The OmniTrader Pro Forum is a place for you to share information and ideas for profitable trading systems with other Pro users.

What Extraordinary Trading Software Looks Like

Trade Plans in Strategies

Trade Plans allow you to use and measure such advanced money management concepts as Partial Exits, Pyramiding, and even Reverse Position Trading.





*Omni*Language

Now anyone can create or add Systems, Indicators, and Exits.

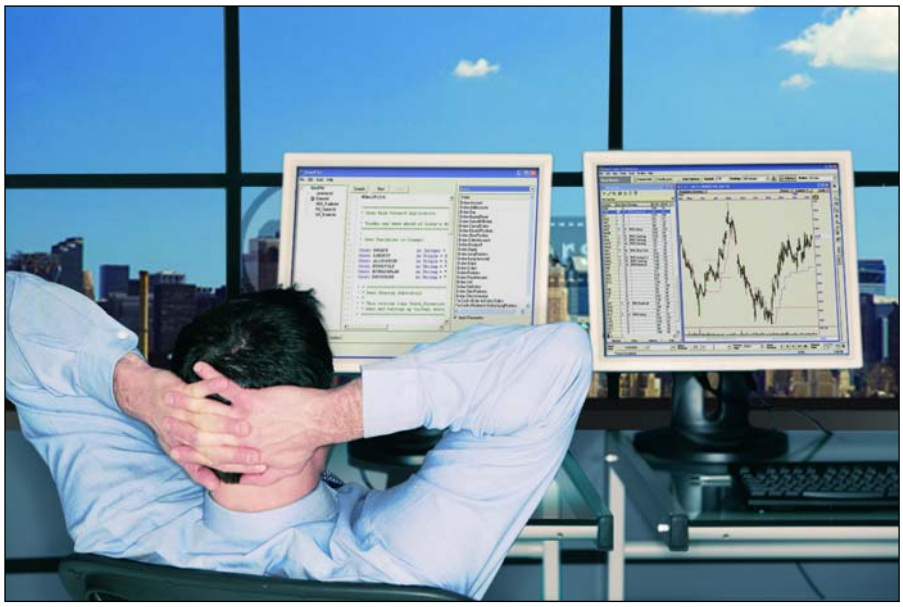
AUTOMATION
with OmniPilot

An Autopilot for OmniTrader Pro!

What if you had an assistant who could run OmniTrader for you to analyze the market and watch for opportunities - to flawlessly run each and every day, keeping you informed and in touch with your money? That's precisely what OmniPilot does.

OmniPilot is an *autopilot* for OmniTrader Professional. It can run the ToDo List and *read* the Signals. It can watch trades form and complete a specified action at each new Buy or Sell Signal. It even has embedded email capability, so it can send text messages to your remote device - cell phone, PDA, or computer - anything with text message or email capability.

OmniPilot is programmable! The OmniPilot scripts are just small Visual Basic programs. You can tune them to do what YOU want them to do. And, if you don't want to do any script programming, we can help you. Each of the example scripts we provide also has a very simple user interface. Enter just a few parameters and activate them with a click. It's that easy.



OmniPilot is an *autopilot* for OmniTrader Pro.

No Programming Required

When we created OmniPilot, we wrote four applications that perform different jobs. The **Walk Forward Trader** runs OmniTrader Pro to simulate a portfolio trading session. It can check your (simulated) account, balance longs and shorts, and even simulate the application of margin. It will tell you how profitable your Strategy is in true market conditions, a valuable asset when it comes time to pull the trigger.

Our other applications - **EOD Trader, IntraDay Trader, and RT Trader** - run OmniTrader Strategies in various modes (end of day, intraday, and real time), alerting you when your Strategies fire signals. Fire up OmniPilot before you leave for the day or when you go to lunch and let it be your autopilot. Freedom at last!

OmniTraders Compete in RoboCon

RoboCon is the world's first robot trading competition. The contestants are using OmniPilot to automate their Strategies in Pro. The first RoboCon is open exclusively to our OmniTrader Professional Beta Test Team. Several professional traders have entered their Trading Robots in the competition, which includes cash prizes. We plan to run **Trading Games** for our Pro users that include cash prizes. But the real prize, of course, is turning these trading robots loose on the markets!

Gain Confidence with our Nirvana Virtual Broker

OmniPilot is the world's first program to usher in the age of automatic portfolio trading for individuals. We know that our users will want to prove out the technology and their Strategies, which is why we have established our Nirvana Virtual Broker. Test your Strategies - or ours - in a real trading environment. Let OmniPilot run OmniTrader Pro, trading precisely the same as if a real broker were used, except without risking any capital. Get comfortable with the OmniPilot process now, and you'll be ready to take advantage of the great news about our live brokerage interface on page 12.

Reach for Your Dreams!

Whatever trading dream you may have, OmniTrader Professional, powered by OmniPilot, can take you there. There is nothing in the world as powerful as this combination. Other trading software may claim they let you "automate your trading system" but they're limited. They can't interact with your portfolio. They can't interact with you. But perhaps the biggest advantage OmniPilot has is that it can act as a user of your trading software, which means it can do just about anything you can imagine. No other trading software can make that claim. Let OmniPilot be your Trading Assistant, and watch your trading dreams become a reality.

For a LIMITED TIME, OmniPilot is Included FREE with Pro

OmniPilot is priced at $995. However, for a limited time, we're including it FREE with the purchase of OmniTrader Professional. This is ground-breaking technology; the time to get on board is NOW!

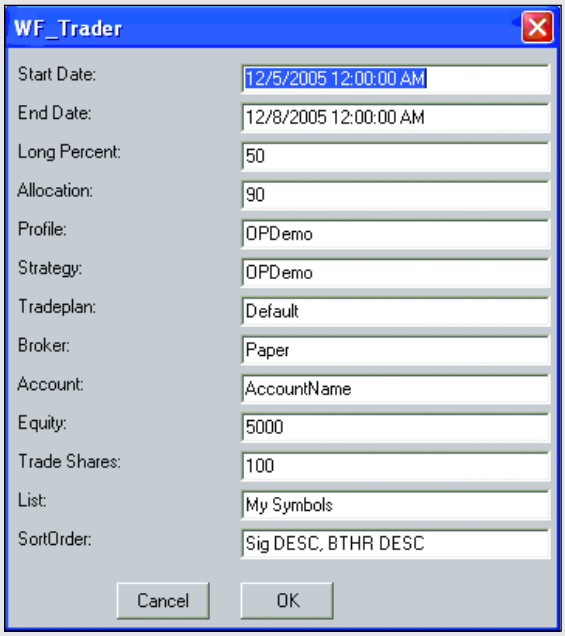
Automations Included in OmniPilot

Walk Forward Trader - Enter a few simple parameters, such as date range and profile, and OmniPilot will execute a true Walk Forward Test using OmniTrader (interface shown below).

End of Day Trader - Set parameters, such as %Long, allowable Margin, and Max Number of Positions, and OmniPilot will run OmniTrader each day to automatically balance your portfolio.

IntraDay Trader - Stay disciplined! Let OmniTrader send you a text message any time a noteworthy event occurs or when you get a new Signal in your End of Day Strategy. Works with OmniData.

Real Time Trader - Set OmniPilot to run your favorite Real Time Strategy(s) and it will alert you via text messaging when Signals are hit on the symbols you follow. Once brokerage is integrated, you will be able to "flip a switch" and activate fully automatic trading (see page 12 for the complete story).



Interfaces are provided for each Automation, like the Walk Forward Trader shown here.

Be in the Right Place at the Right Time . . . without having to be there!

OmniPilot connects you to the market. Just establish the Strategies you want to monitor, and let OmniPilot do the rest. It guides and watches OmniTrader minute-by-minute.

When a Trading Signal fires, OmniPilot will send a text message to your cell phone, pager, or PDA. (See www.nirv.com/devices for a list of great, inexpensive wireless solutions!)

Go about your day, confident that OmniPilot is watching the action for you. **Never miss another Big Move again!**

COMING SOON!

Brokerage Integration Platform

Our developers are currently adding several popular on-line brokers into OmniTrader Professional. With integrated brokerage, our users will be able to trade directly from their charts using Trade Plans. They will also be able to instruct OmniPilot to automatically trade their Strategies, or contact them for trade authorization through OT Remote, described next. The dawn of fully automated trading is here!

OmniPilot will be able to send trades directly to the broker (Spring 2006), or interact with you anywhere in the world through OT Remote.

Remote Access for OmniTrader Pro

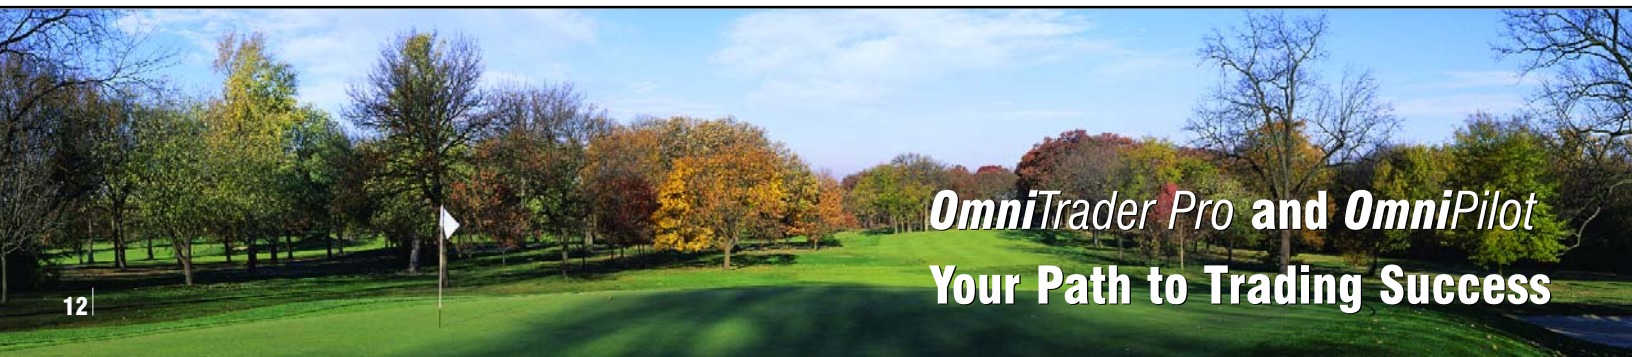
A trading application called OT Remote will soon be available to all Pro owners. With OT Remote, you will be able to interact directly with your OmniTrader Pro running at home or at the office.

Picture this scenario:
You are approaching the tee on number seven, a par 4. As you stop the golf cart, your wireless phone/PDA rings. You look at it, and see "OmniTrader Pro" in the display. You answer the call and see a chart with a confirmed signal. Click the Market tab to see what the market is doing, or the Group tab to check out the industry group.

You see a great breakout trade with everything "green," so you push the Trade button, put the phone back in its holster and drive the ball. Can trading really be this easy? Yes!

When You're Ready—Put Your Trading on AutoPilot

Begin to use Pro and OmniPilot now to gain confidence in your strategies and the automation process. When integrated brokerage and OT Remote are released this spring, you will be ready to FULLY AUTOMATE your strategy. Then, you have the power to allow OmniPilot to trade by itself or interactively notify you for trade authorizations.



*Omni*Trader *Pro Forum*

A COMMUNITY of Traders

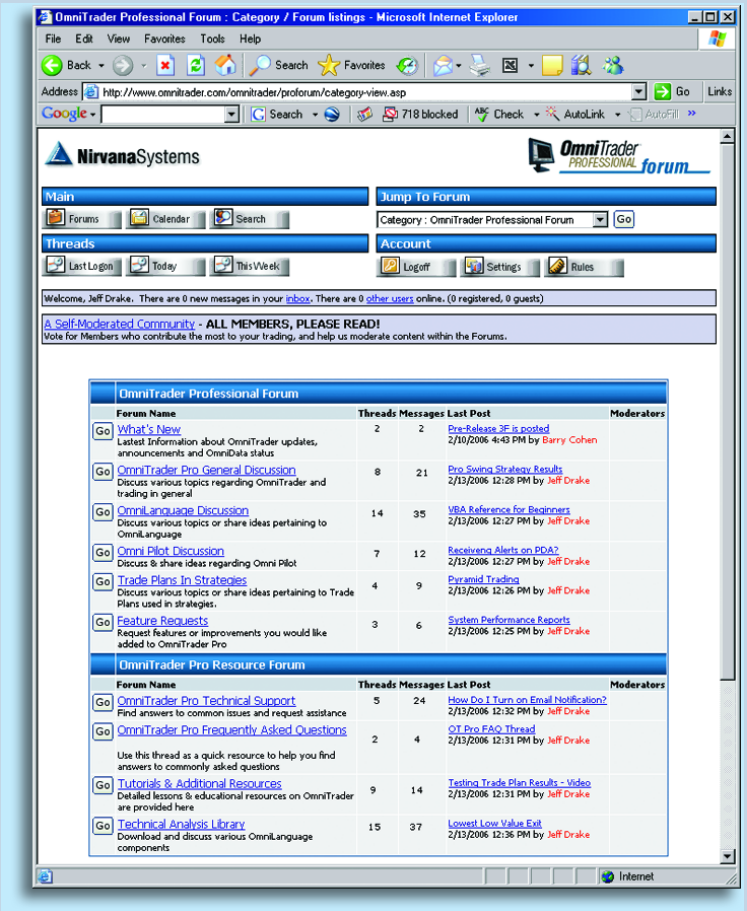
Connecting Users—Sharing Winning Ideas

Over the years, we have had the unique opportunity to work with some of the finest traders in the world. And from our Nirvana Club forum experience, we understand the enormous potential to empower OmniTrader Professional users by connecting them with each other. With your purchase of OmniTrader Professional, you get instant access to a diverse group of traders from all over the world who are enthusiastic about sharing their trading ideas with others. This is the ideal place to learn from the experience and knowledge of fellow traders. You will be able to ask questions, share experience, and gain new insight. Our team will be monitoring the forum, answering questions and posting new ideas and tips on how to benefit from the power of Pro.

Instant Access to Real World Strategies

We have also launched the OmniTrader Professional Systems and Indicators web site to help you get up and running. You will find free downloads of the most recent Trading System ideas that have been published in *Technical Analysis of Stocks and Commodities (TASC), Active Trader, Barron's* and on select web sites. The ideas presented will be coded in OmniLanguage and include the logic and explanations presented. Jeff Drake and his team will be uploading their most recent findings and sharing valuable insight into their cutting-edge research.

When you purchase OmniTrader Professional, you get much more than just software. You join a COMMUNITY of traders, so get connected today!



NEW Seminar from Ed Downs

Bonus Gift Included FREE with Pro

Creating Profitable Strategies with OmniTrader PROFESSIONAL

& Automating them with OmniPilot!

Creating Profitable Strategies with OmniTrader Pro is an interactive seminar designed to give our new Pro users a head start. This isn't just a "how-to" seminar. It's also a "why-to." I don't just show you how to write Systems - I show you WHY I used the given elements and HOW they increased profitability.

In the seminar, I answer questions like…

- Why did I choose the Indicators I did?
- How did I create my Trading System?
- How did I improve performance?
- Why did I choose a given Trade Plan?
- How did I boost profits EVEN FURTHER?

and more!

I create my entire Channel Trading Strategy from scratch, starting with Indicators and Systems. I show you how I wrote the System and how I test performance and improve profitability based on the results. I walk you through the complete process of building and testing a Trade Plan. Finally, I put my new, winning Strategy on autopilot using OmniPilot.

Every step of the process is 100% explained. My goal is to empower you, our OmniTrader Pro user, with the tools and knowledge you need to be successful with this powerful program.

But you don't just get education - you also get a valuable Strategy using one of my best ideas. With the Channel Trading Strategy, I am seeing in excess of 30% Forward Test APR on the S&P 100.

OmniTrader Pro is the most powerful trading software ever invented. In this seminar, I'll prove it!

Get Ed's Channel Trading Strategy FREE!

Channel Trading Strategy was created using the awesome new tools in OmniTrader Professional.

In Ed's own words, "OmniTrader Pro is orders of magnitude better than anything else out there. I want our users to see just how easy it is to create winning Trading Strategies with this powerful new tool." You also get Ed's Channel Trading Strategy, showing mechanical profitability on Forward Test data! This new seminar and Channel Strategy are easily worth the cost of Pro on their own.

*Omni*Trader PROFESSIONAL
The Next Generation of Trading Software
Order by March 17th and SAVE!

*Omni*Trader PROFESSIONAL

Important Information: Nirvana Systems, Inc. is not an investment advisory service, nor a registered investment advisor or broker/dealer. No investment or trading advice, recommendation or strategy regarding any security, group of securities, market segment or market is intended or shall be given. Past performance, whether actual or indicated by historical tests of strategies, is no guarantee of future performance or success. The purpose of any particular trading strategy, technique, method or approach discussed or demonstrated is solely to illustrate how OmniTrader Professional may be used. No representation is being made that it will guarantee profits, an increase in profits or the minimization of losses.

Our software is backed by our unconditional Money Back Guarantee. If for any reason you are not satisfied with OmniTrader Professional, you may return the software, within 30 days of purchase, for a 100% refund, less shipping and handling. Texas residents add 8.25% sales tax.

OmniTrader PROFESSIONAL **Now Available!**

"The release of OmniTrader Professional is, without a doubt, the single most significant event of my career." - Ed Downs

OmniTrader Professional Gives You Revolutionary Trading Power…

PERFORMANCE

By incorporating Trade Plans into the Strategy block, OmniTrader Professional's Strategies are the most powerful that we have ever released. These five new Strategies are all demonstrating Forward Test profitability.

PROGRAMMABILITY

The easy to use and flexible programming language in OmniTrader Professional will enable programmers and nonprogrammers alike to write their own Strategies and adopt others. With OmniLanguage, there are no barriers to creating precisely the kind of system you want.

AUTOMATION

OmniPilot is the most powerful automation tool ever released. By automating your trading strategies, you can conquer your emotions, gain trading discipline and never miss another big move.

COMMUNITY

We are connecting users with one another in our all new OmniTrader Pro Forum. This is a community where users can share their trading ideas. Our staff has implemented a Systems and Indicators web site, where you can download the latest Indicators and Systems.
